

EASY EV HOME CHARGING!

WHAT? ?

The Government will subsidise car parks of existing private residential buildings to install charging-enabling infrastructure so that EV users can easily install their preferred chargers in the future.

WHY? ⚡

With easy charging, more people will switch to use EVs, hence further improving the air quality.

HOW? ➡

Owners' corporations or DMC managers can submit applications for the scheme.

**Application starts on
21 October 2020**

環境保護署
Environmental Protection Department
