

環境保護署就「EV 屋苑充電易資助計劃」申請人 選聘工程顧問或承建商的一般建議

「EV 屋苑充電易資助計劃」自 2020 年 10 月推出至今，已有不少申請人聘用了工程顧問及／或承建商進行安裝工程，這些申請人對所聘用的工程顧問或承建商的表現有所認識。我們建議尚未聘用工程顧問或承建商的申請人或可在與所揀選的工程顧問或承建商簽訂合約前，向已聘用工程顧問或承建商的業主立案法團或公契經理人，查詢有關該工程顧問或承建商的表現及意見，才作出最後的決定。

申請人可以到「EV 屋苑充電易資助計劃」的專屬網頁 <https://www.evhomecharging.gov.hk/tc>，查閱已聘用工程顧問的屋苑名單。

**EPD's General Advice to Applicants of
the EV-charging at Home Subsidy Scheme on
Selection and Employment of Consultants or Contractors**

Many applicants of the EV-charging at Home Subsidy Scheme (“EHSS”) have already employed consultants and / or contractors to carry out the installation works since the launch of the EHSS in October 2020, and they have knowledge of the performance of their employed consultants or contractors. We suggest applicants who have yet to employ consultants or contractors may seek advice from those owners’ corporations or the deed of mutual covenant managers who have already employed consultants or contractors about the performance of the selected consultants or contractors, before making the final decision to sign the contracts with the selected consultants or contractors.

Applicants can check the list of buildings / estates which have already employed consultants at EHSS’s dedicated webpage (<https://www.evhomecharging.gov.hk>).
