

EV-charging at Home Subsidy Scheme (“EHSS”) Technical Workshop

The Government rolled out a \$2 billion EV-charging at Home Subsidy Scheme (“EHSS”) to subsidise the installation of EV charging-enabling infrastructure (“EVCEI”) in car parks of existing private residential buildings, and hence further facilitate EV owners to install EV chargers at car parks of their residences accordingly to their own needs in the future in a simple and easy manner. The EHSS will run for about three years, with a view to cover roughly 60,000 private parking spaces.

To enhance the consultant and contractor’s understanding of the EHSS, the Environmental Protection Department will conduct an online technical workshop to introduce the EHSS, including the design principles of EVCEI and qualifications of tenderers required.

Enrolment:

Please return the completed enrolment form two working days before the workshop by sending an email to evcharginghk@gmail.com or fax to 37411931. The login details will be sent to successful participants.

For any enquiries, please call 3741 1343 for assistance. (Mon – Fri 9am – 5pm)
